AMENDMENT AND REQUEST FOR RECONSIDERATION UNDER
37 C.F.R. §1.111

In response to the Official Action mailed October 9,
2002, please amend the above-identified patent application as
follows:

In the Claims:

Please cancel claim 12 and add new claims 18 and 19.

21
1. (Twice Amended) A transgenic plant expressing an N gene,
having enhanced resistance to a plant disease-causing agent
selected from the group consisting of tobamoviruses, elicitin-
producing fungi, parasiticein-producing fungi, cryptogein-
producing fungi, harpin-producing bacteria, tobacco mosaic
virus and Phytophthora fungi; wherein said transgenic plant is
stably transformed with a nucleic acid construct comprising
the figwort mosaic virus 35S promoter operably linked to a
nucleic acid molecule selected from the group consisting of a
sequence set forth in SEQ ID NO:1 or a sequence having 90%
sequence identity therewith encoding a functional kinase
enzyme, said nucleic acid molecule being expressible in a
plant cell.

32
4. (Amended) A transgenic plant expressing an N gene,
